

GENERAL DIMENSIONS

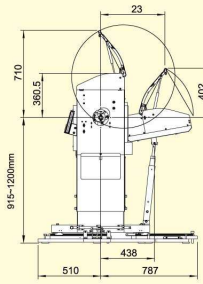

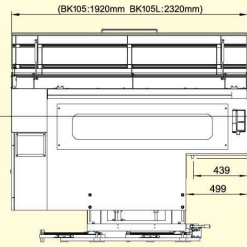

MACHINE SERVICE SPACE

MODEL	BK105	BK105L
BAR DIAMETER	5mm-105mm	
BAR CAPACITY	105mm / 5pcs	
BAR LENGTH	1100mm	1600mm
MACHINE WEIGHT	600kg	700kg
POWER SUPPLY	220V / 380V / 400V / 415V / 440V

BARLOAD[®]
 Automatic Bar Feeder
 BARLOAD MACHINE CO., LTD.

DESIGNED BY JAM 885-A-222-2019

Quality · Innovation · Reliability · Experience

Cyclone 105
 SHORT BAR FEEDER

BK Series

- Increase productivity and reduce manufacturing cost.
- No vibrations, allow precision machining at high speed.
- Stronger mechanically design, max bar diameter up to 105mm.
- Servo feeding system, permit accurate positioning bar without turret stop.
- Adjusting free when bar diameter change.
- External LED display, more easily monitor feeding and alarm situation.

BK105 Series

- External LED display, hand remote controller greatly increase operation convenience.

- Optical sensor top-cut system, precision measuring with any diameter.

- Friendly HMI system with touch screen, easy and simple setting.

- Quickly pusher change.

- Magazine capacity max for 105mm bar x 5 pcs. Movable rail with X way, Z way and 45° all function 3 in 1. Convenient for machine service, changing belt or spindle liner.

- Fully functional PLC control combined with comprehensive data bank software, perfectly interfaced with the CNC lathe.

- Loading system.
